

TOWN OF ROUND HILL

Sewer Ordinance

Adopted on May 18, 2017

AN ORDINANCE AMENDING CERTAIN SECTIONS OF THE ROUND HILL SEWER ORDINANCE

BE IT ORDAINED by the Town Council of Round Hill, Virginia, that the Round Hill Sewer Ordinance, be amended and re-enacted as follows:

**ARTICLE I
Definitions**

Unless the context specifically indicates otherwise, the meaning of terms used in this ordinance shall be as follows:

- Section 1 “Accessory Structure” shall refer to the definition in the Round Hill Zoning Ordinance
- Section 1 “Applicant” shall mean the owner, or duly authorized representative, such as a builder, developer, or plumber who applies for a sewer service connection.
- Section 2 “Availability Fee” shall mean that portion of the “Tap Fee” which covers the Town’s cost to construct and develop sewage treatment facilities, lift stations, sewer lines, etc. The “Availability Fee” shall be based upon the type of land use being served, actual cost to the Town to provide these services and the size of the water line and meter required.
- Section 3 “BOD” (Biochemical Oxygen Demand) shall mean the quantity of dissolved oxygen, expressed in milligrams per liter, utilized in the biochemical oxidation of organic matter during incubation at 20 C, in the dark for five (5) days.
- Section 4 “Building Drain” shall mean that part of the lowest horizontal piping of a drainage system which receives the discharge from soil, waste, and other drainage pipes inside the building and conveys it to the building sewer beginning five (5) feet from the outer face of the building wall.
- Section 5 “Building Sewer” shall mean the sewer pipe extension from the residence or building to the Public Sewer.
- Section 6 “Collection System” shall mean lift stations and lines for purpose of delivering wastewater to the treatment plant.
- Section 7 “Connection Fee” shall mean that portion of the “Tap Fee” which covers the Town’s cost to install the sewer service connection and/or to inspect the owner’s connection to the public sewer.
- Section 8 “Customer” shall mean the party who has applied for sewer service and will be responsible for paying applicable bills. “Customer” shall also mean the owner of property, or duly authorized representative, such as a builder, developer, or plumber who installs, constructs, or builds sewer lines and laterals.
- Section 9 “Customer Force Main” shall mean the portion of the pressure sewer pipeline connecting the Grinder Pump Chamber to the Public Force Main. The Customer Force Main includes the pipe and any associated valves and check valves along its length as well as the connection to the Public Force Main.
- Section 10 “Dwelling Unit” shall mean one room, or rooms connected together, constituting a separate, independent housekeeping establishment for owner occupancy, or rental or lease on a weekly, monthly or longer basis, and physically separated from any other rooms or dwelling units which may be in the same structure, and containing independent cooking and sleeping facilities.

- Section 11 “Garbage” shall mean solid wastes from the domestic and commercial preparation, cooking, and dispensing of food, and from the handling, storage, and sale of produce.
- Section 12 “Grinder Pump” shall mean the pump that resides in the Grinder Pump Chamber that provides the energy to push sewage flow through the pressure sewer lines. (l).
- Section 13 “Grinder Pump Chamber” (Chamber) shall mean the buried structure that houses the grinder pump and collects sewer flow from the residence. The Building Drain and Customer Force Main are connected to the Chamber.
- Section 14 “Industrial Wastes” shall mean the liquid wastes from industrial manufacturing processes, trade, or business as distinct from sewage.
- Section 15 “Natural Outlet” shall mean any outlet into a watercourse, pond, ditch, lake, or other body of surface or groundwater.
- Section 16 “Owner-Customer” shall mean the customer who owns title to the premises to which sewer service is provided.
- Section 17 “Person” shall mean any individual, firm, company, association, society, corporation, or group.
- Section 18 “pH” shall mean the logarithm of the reciprocal of the hydrogen ion concentration in gram/mole per liter.
- Section 19 “Premise” shall mean:
- a) Each residential dwelling structure.
 - b) Each residential dwelling unit in a duplex, triplex, apartment building, or in any other building that is used for residential purposes.
 - c) Each unit contained in a structure serving more than one tenant, lessee, or owner; and used for any purpose other than residential.
 - d) Each structure or group of contiguous structures, that is owned, rented, or leased by one person and occupied by that person.
 - e) The following shall also be considered one premise:
 - i. Residence used as a rooming house
 - ii. Dwelling or building for transients
 - iii. Apartment building or residential condominium where the water utility bill is included in the rent or condominium fee.
- Section 20 “Properly Shredded Garbage” shall mean the wastes from the preparation, cooking, and dispensing of food that have been shredded to such a degree that all particles will be carried freely under the flow conditions normally prevailing in public sewers, with no particle greater than one-half (1/2) inch (1.27 centimeters) in any dimension.
- Section 21 “Public Force Main” shall mean the portion of the pressure sewer pipeline conveying, or potentially conveying the wastewater flow for more than one residential customer. The Public Force Main typically resides within a sewer easement or the public right of way.
- Section 22 “Public Sewer” shall mean a manhole or common sewer pipe serving more than one property. A Public Sewer is owned and operated by the Town and is located in an easement or right of way.
- Section 23 “Sanitary Sewer” shall mean a sewer which carries sewage and to which storm, surface, and ground waters are not intentionally admitted.
- Section 24 “Sewage” shall mean a combination of the water-carried wastes from residences, commercial

buildings, institutions, and industrial establishments, together with such ground, surface, and storm waters as may be present.

- Section 25 “Sewage Treatment Plant (Wastewater Treatment Plant)” shall mean any arrangement of devices and structures used for treating sewage.
- Section 26 “Sewage Works” shall mean all facilities for collecting, pumping, treating, and disposing of sewage.
- Section 27 “Sewer” shall mean a pipe or conduit for carrying sewage.
- Section 28 “Shall” is mandatory; “may” is permissive.
- Section 29 “Slug” shall mean any discharge of water, sewage, or industrial waste which in concentration or loading of any given constituent or in quantity of flow exceeds five times the annual average daily amount divided by 96 for any period of time longer than 15 (fifteen) minutes in duration.
- Section 30 “Storm Drain” (sometimes termed “storm sewer”) shall mean a pipe or conduit which carries storm and surface waters and drainage, but excludes sewage and industrial wastes, other than unpolluted cooling water.
- Section 31 “Suspended Solids” shall mean solids that either float on the surface of, or are in suspension in water, sewage, or other liquids, and which are removable by laboratory filtering as prescribed in “Standard Methods for the Examination of Water and Wastewater.”
- Section 32 “Tap” shall mean sewer service.
- Section 33 “Tap Fee” shall mean the fee charged by the Town to provide sewer service. A tap fee consists of a connection fee and an availability fee.
- Section 34 “Temporary family health care structures” as defined in Virginia Code of 1950, as amended, section 15.2-2292.1
- Section 35 “Tenant-Customer” shall mean the customer who rents the premises to which sewer service is provided
- Section 36 “Town” shall mean the Town of Round Hill, Virginia.
- Section 37 “Town of Round Hill Service Area” shall refer to all of the land within the Round Hill town limits and the land within an adjacent service area that is under Loudoun County jurisdiction. [A copy of the Town of Round Hill Service Area Map is available upon request and is also listed on the Town Website]

ARTICLE II

Use of Public Sewers: Availability and Allocations

- Section 1 It shall be unlawful for any person to place, deposit, or permit to be deposited in any unsanitary manner on public or private property within the Town, or in any area under the jurisdiction of said Town, any human or animal excrement, garbage, or other objectionable waste.
- Section 2 It shall be unlawful to discharge to any natural outlet within the Town, or in any area under the jurisdiction of the Town, any sewage or other polluted waters, except where suitable treatment has been provided in accordance with subsequent provisions of this ordinance.
- Section 3 It shall be unlawful to construct and/or maintain any privy, privy vault, septic tank, cesspool, or other facility intended or used for the disposal of sewer within the corporate limits of the Town.

- Section 4 The owners of all houses, buildings, or properties used for human occupancy or employment, or other purposes, situated within the Town and abutting on or served by a right-of-way adjoining any street, alley, or right-of-way in which there is now located or may in the future be located a public sewer, is hereby required, at his/her expense to install suitable toilet facilities therein, and to connect such facilities directly with the proper public sewer in accordance with the provisions of this ordinance and other Town ordinances, within ninety (90) days after the date of official notice to do so.
- Section 5 Sewer allocation shall be based on building type used in gallons per day applied per tap and as determined by the Town. Requests for sewer allocations must be made in writing using the Public Sewer Application.
- Section 6 Sewer taps may be available outside of the town limits, but within the Town of Round Hill Service Area. Availability shall be determined based upon the uncommitted capacity of the wastewater treatment facility (as determined by the Commonwealth of Virginia and the Town) and the proximity of the public sewer to the subject lot or lots. The proximity of the public sewer to an out-of-town lot does not guarantee the right to connect to the public sewer. All requests for out-of-town taps shall be approved by the Town Council.

ARTICLE III Treatment Capacity

- Section 1 The design capacity of the Town's wastewater treatment plant (WWTP) shall be limited to 750,000 gallons per day.
- Section 2 The allocated capacity of the WWTP shall be calculated on a periodic basis as determined by the Town Council based on recommendations of the Town staff.
- Section 3 This calculation shall include the following:
- (a) The average daily flow for the most recent 12-month period.
 - (b) Allocations for all undeveloped land within the corporate limits at current zoning.
 - (c) Allocations for all taps which have been approved but not yet connected.
 - (d) Allocations for any other taps which have been reserved by the Town.
- Section.4 Should the allocated capacity of the WWTP equal, or exceed 75% of the in-place treatment capacity, or in the event the Town is enjoined by State regulations, the Town shall not:
- (a) Accept new applications for out-of-town taps.
 - (b) Annex land, or otherwise adjust the Town boundary, to increase the number of in-town taps the Town would be required to reserve.
 - (c) Accept any new applications to re-zone property that would increase sewer capacity.

ARTICLE IV Sewer Taps and Connections

- Section 1 All requests for public sewer service connections, extensions and expansions of existing connections to new uses, buildings, structures or significant changes in anticipated demand beyond those of the original connection shall be submitted using the Public Sewer Application. The purpose of the application is to:
- (a) Confirm the quantity of fixtures;
 - (b) Confirm the number of users;

- (c) Review plans and specifications for the proposed building sewer service line;
- (d) Contact the contractor or firm who will perform the construction;
- (e) Ensure all plumbing and construction work is approved by the Loudoun County Department of Building and Development; and to

Section 2 If a property is located within the Round Hill town limits, the Town Administrator shall not approve a public sewer application without confirmation of Town Zoning Permit approval and/or County Building Permit approval. If a property is located in the Round Hill Service Area but not within the Round Hill Town limits, the Town Administrator shall not approve a public sewer application without confirmation of County Zoning Permit approval and/or County Building Permit approval.

Section 3 Availability fees shall be paid in full at the time of public sewer application. At the time of actual connection, the applicant will pay the connection fee. If payment of the connection fee is more than 365 days after payment of the availability fee, the applicant shall pay the differential between the availability fee previously paid and the then current availability fee amount. If tap(s) remain unused for 365 days after application approval, a maintenance fee at the current rate will be charged per tap. The maintenance fee will be the minimum usage rate charged at time of connection.

Section 4 No unauthorized person shall uncover, make any connections with or opening into, use, alter, or disturb any public sewer or appurtenance thereof without first obtaining a written permit from the Town.

Section 5 There shall be two (2) classes of building sewer permits: for residential and commercial service, and for service to establishments producing industrial wastes. In either case, the owner or agent shall make application on a special form furnished by the Town. The permit application shall be supplemented by any plans, specifications, or other information considered pertinent.

Section 7 All costs and expenses including work by Town staff or Town contractor, etc. incident to the installation, connection, and inspection of the building sewer shall be borne by the applicant. The owner shall indemnify the Town from any loss or damage that may directly or indirectly be occasioned by the installation of the building sewer.

Section 8 Each lot recorded for future development is required to have a minimum of one (1) tap. Up to two (2) buildings may be serviced on one (1) recorded lot provided that each building and/or structure has an individual tap and that tap fees are paid for each building and/or structure. An upgrade in the tap fee may be required at the discretion of the Town if the actual and expected use exceeds the service capacity. Prior to the commencement of work to connect to the public sewer main, all Town and County permits must be secured.

An accessory structure can share the service line of the principal structure provided it meets the following conditions:

- (a) The accessory structure is not a separate use,
- (b) The accessory structure is not a residential dwelling unit,
- (c) The accessory structure is subordinate and incidental to the principal structure,
- (d) The extension meets County Plumbing Code,
- (e) Demand does not exceed the capacity of the provided meter and service line,
- (f) Public Sewer Application is submitted requesting the shared service line with payment of an administrative fee for staff review and inspection. The application will state that an individual tap and tap fee will be required if the accessory structure has a change of use.

Section 9 The discontinuance of water service to a customer does not preclude payment of the minimum sewer charge.

Section 10 The size, slope, alignment, materials of construction of a building sewer, and the methods to be used in excavating, placing of the pipe, jointing, testing, and backfilling the trench, shall all

conform to the requirements of the building and plumbing code and other applicable rules and regulations of the Town. The connection of the building sewer into the public sewer shall conform to the requirements of the County building and plumbing code and other applicable rules and regulations of the Town and federal environmental regulations. All such connections shall be made gastight and watertight. Any deviation from the prescribed procedures and material must be approved by the Town before installation. In the event of conflict, the most stringent rules and regulations shall govern.

Section 11 Whenever possible, the building sewer shall be brought to the building drain at an elevation below the basement floor. In all buildings in which any building drain is too low to permit gravity flow to the public sewer, sanitary sewage carried by such building drain shall be lifted by an approved means and discharged to the building sewer at the expense of the property owner.

Section 12 No person shall make connection of sump pumps, roof downspouts, exterior foundation drains, areaway drains, or other sources of surface runoff or groundwater to a building sewer or building drain which in turn is connected directly or indirectly to a public sewer.

Section 13 The applicant for public sewer service shall notify the Town when the sewer service connection(s) is/are ready for inspection and connection to the public sewer system. The connection(s) shall be made under the supervision and approval of the Town and according to applicable regulations. The connection(s) shall not be backfilled before a visual inspection and approval by the Town staff. Upon receiving written notification from the Town staff that the connection(s) are in compliance with all regulations, the County Occupancy Permit may be signed by the Town Administrator or designee.

Section 14 All excavations for building sewer installation shall be adequately guarded with barricades so as to protect the public from hazard. Streets, sidewalks, parkways, and other public property disturbed in the course of the work shall be restored in a manner satisfactory to the Town.

ARTICLE V Use of the Public Sewer

Section 1 No person shall discharge or cause to be discharged any storm water, surface water, groundwater, roof runoff, subsurface drainage, uncontaminated cooling water, or unpolluted industrial process waters or other unpolluted drainage to any sanitary sewer.

Section 2 No person shall discharge or cause to be discharged any of the following described waters or industrial wastes to any public sewers:

(a) Any gasoline, benzene, naphtha, fuel oil, or other flammable or explosive liquid, solid, or gas.

(b) Any water or wastes containing toxic or poisonous solids, liquids or gases in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals, create a public nuisance, or create any hazard in the receiving waters of the sewage treatment plant, including but not limited to cyanides in excess of two (2) mg/l as CN in the wastes as discharged to the public sewer.

(c) Any waters or wastes having a pH lower than 5.5 or above 9.5, or having any other corrosive property capable of causing damage or hazard to structures, equipment, and personnel of the sewage works.

(d) Solid or viscous substances in quantities or of such size capable of causing obstruction to the flow in sewers, or other interference with the proper operation of the sewage works such as, but not limited to ashes, cinders, sand, sanitary napkins, disposable diapers, plastic applicators, mud, straw, shavings, metal, glass, rags, feathers, paunch manure, hair and fleshings, entrails and paper

dishes, cups, milk containers, etc. either whole or ground by garbage grinders.

Section 3

No person shall discharge or cause to be discharged the following described substances, materials, waters, or wastes if it appears likely that such wastes can harm either the sewers, sewage treatment process, or equipment, have an adverse effect on the receiving stream, or can otherwise endanger life, limb, public property, or constitute a nuisance. In forming an opinion as to the acceptability of these wastes, the Town will give consideration to such factors as the quantities of subject wastes in relation to flows and velocities in the sewers, materials of construction of the sewers, nature of the sewage treatment process, capacity of the sewage treatment plant, degree of treatability of wastes in the sewage treatment plant, and other pertinent factors. The substances prohibited are:

- (a) Any liquid or vapor having a temperature higher than one hundred fifty (150) F (65 C).
- (b) Any water or waste containing fats, wax, grease, or oils, whether emulsified or not, in excess of one hundred (100) mg/l or containing substances which may solidify or become viscous at temperatures between thirty-two (32) and one hundred fifty (150) F (0 and 65 C).
- (c) Any garbage that has not been properly shredded. The installation and operation of any garbage grinder shall be subject to the review and approval of the Town.
- (d) Any waters or wastes containing strong acid iron pickling wastes, or concentrated plating solutions whether neutralized or not.
- (e) Any waters or wastes containing iron, chromium, copper, zinc, and similar objectionable or toxic substances; or wastes exerting an excessive chlorine requirement (as compared to normal domestic wastewater) to such degree that any such material received in the composite sewage at the sewage treatment works exceed the limits established by the Town for such materials.
- (f) Any water or wastes containing phenols or other taste or odor producing substances, in such concentrations exceeding limits which may be established by the Town as necessary, after treatment of the composite sewage, to meet the requirements of the State, federal, or other public agencies of jurisdiction for such discharge to the receiving waters.
- (g) Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the Town in compliance with applicable state or federal regulations.
- (h) Materials which exert or cause unusual concentrations of inert suspended solids (such as, but not limited to clay fullers, earth, lime slurries, and lime residues) or of dissolved solids (such as, but not limited to, sodium chloride and sodium sulfate).
- (i) Excessive discoloration (such as, but not limited to) from dye wastes and vegetable tanning solutions.
- (j) Unusual BOD, chemical oxygen demand, or chlorine requirements in such quantities as to constitute a significant load on the sewage treatment works.
- (k) Unusual volume of flow or concentration of wastes constituting "slugs" as defined herein.
- (l) Waters or wastes containing substances which are not amenable to treatment of reduction by the sewage treatment processes employed, or are amenable to treatment by not to such a degree that the sewage treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters.

Section 4

If any waters or wastes are discharged, or are proposed to be discharged to the public sewers, which contain the substances or possess the characteristics enumerated in Section 4 of this Article, and which in the judgment of the Town, may have a deleterious effect upon the sewage works,

processes, equipment, or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the Town may:

- (a) Reject the wastes,
- (b) Require pretreatment to an acceptable condition for discharge to the public sewers;
- (c) Require control over the quantities and rates of discharge, and/or
- (d) Require payment to cover the added cost of handling and treating the wastes not covered by existing taxes or sewer charges under the provisions of this article. The amount will be based upon the cost to treat the additional unit of waste times the volume.

If the Town permits the pretreatment or equalizations of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the Town, and subject to the requirements of all applicable codes, ordinances, and laws.

Section 5 Grease, oil, and sand interceptors shall be required when, in the opinion of the Town, they are necessary for the proper handling of liquid wastes containing grease in excessive amounts, or any flammable wastes, sand, or other harmful ingredients; except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of a type and capacity approved by the Town, and shall be located as to be readily and easily accessible for cleaning and inspection. They shall be purchased, installed, and maintained at the property owner's expense. Traps and interceptors shall be inspected annually or more often if necessary. Inspection reports shall be forwarded to the Town of Round Hill. The Town reserves the right to conduct its own inspections.

Section 6 Where preliminary treatment or flow-equalizing facilities are provided for any waters or wastes, they shall be maintained continuously in satisfactory and effective operation by the owner at his/her expense.

Section 7 When required by the Town, the owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable control manhole together with such necessary meters other appurtenances in the building sewer to facilitate observation, sampling, and measurement of the wastes. Such manhole, when required, shall be accessibly and safely located, and shall be constructed in accordance with plans approved by the Town. The manhole shall be installed by the owner at his/her expense, and shall be maintained by him/her so as to be safe and accessible at all times.

Section 8 The Town reserves the right to determine the quantity and/or quality of sewage by any reasonable method of measurement and/or analysis. If the quality of the sewage discharge into the public sewer does not comply with the requirement of this ordinance, immediate steps shall be taken to comply, and all costs of necessary analysis and remediation shall be borne by the customer.

Section 9 No statement contained in this article shall be construed as preventing any special agreement or arrangement between the Town and any industrial operation whereby an industrial waste of unusual strength or character may be accepted by the Town for treatment, subject to payment therefore, by the industrial operation.

Section 10 The Town shall bear no responsibility for the purchase, installation, use, operation, maintenance, service, repair, or replacement of the grinder pump and/or its low-pressure force main or lateral. Each property owner served by a grinder pump shall bear full responsibility for providing, installing, using, operating, maintaining, servicing, repairing and replacing his/her grinder pump and/or its low-pressure force main or lateral. Each property owner served by a grinder pump shall have full responsibility for using the pump consistent with the manufacturer's instructions and shall avoid introducing into the sewerage system materials that may damage the impellers on the pump, including but not limited to items designated as biodegradable in septic tanks.

ARTICLE VI

Temporary Family Health Care Structures

- Section 1 Service to Temporary Family Health Care Structures requires a Public Sewer Application
- Section 2 The sewer line shall be temporarily connected “piggybacked” off the line providing sewer service to the property by the Town of Round Hill. The lines servicing the temporary health care structure are encouraged to be constructed above ground according to industry standards including freeze protection.
- Section 3 The sewer line shall be constructed so that it can be disassembled when the qualifying individual, as defined in the State Code, no longer resides in the structure and the structure shall be removed within 60 days after the qualifying individual no longer resides in the structure.
- Section 4 Town staff shall be authorized to inspect the structure for compliance with these regulations annually or more often if deemed necessary.
- Section 5 The Town shall have the right to remove the sewer line if not removed by the property owner. The property owner shall be charged if Town staff is required to remove the line.

ARTICLE VII Protection from Damage

- Section 1 No person shall maliciously, willfully, or negligently break, damage, destroy, uncover, deface or tamper with any structure, appurtenance, or equipment which is part of the public sewer works. Any person violating this provision shall be subject to prosecution.
- Section 2 While performing any necessary work on private properties, the employees of the Town shall observe all safety rules applicable to the property established by the owner against loss or damage to its property by Town employees and against liability claims and gauging and sampling operations, except as such may be caused by negligence or failure of the owner or business to maintain safe conditions.
- Section 3 The employees of the Town shall be permitted to enter all properties through which the Town holds a duly negotiated easement for the purposes of, but not limited to, inspection, observation, measurement, sampling, repair, and maintenance of any portion of the sewage works lying within said easement. All entry and subsequent work, if any, on said easement, shall be done in full accordance with the terms of the duly recorded easement pertaining to the private property involved.
- Section 4 The Town will not be held responsible for any damage to personal property or real property due to the malfunction of the public sewer, the building sewer and building drain.

ARTICLE VIII Penalties

- Section 1 Any person found to be violating any provision of this ordinance shall be served by the Town with written notice and summons stating the nature of the violation and providing a reasonable time limit for the satisfactory correction thereof. The offender shall, within the period of time stated in such notice, permanently cease all violations.
- Section 2 Any person who shall continue any violation beyond the time limit provided for in Article VII, Section 1, shall be prosecuted to the fullest extent of the law.
- Section 3 Any person violating any of the provisions of this ordinance shall become liable to the Town

for any expense, loss, or damage occasioned the Town by reason of such violation.

- Section 4 Any person found in violation of any provision of the Sewer Ordinance shall be assessed civil penalties as follows:
- a. \$100 for the initial violation/summons
 - b. \$150 for each subsequent violation/summons. Each incidence of a violation shall constitute a separate offense.
 - c. No civil penalties imposed for violations arising from the same operative set of facts shall exceed \$100,000.

**ARTICLE IX
Billing**

- Section 1 Billing for sewer service will be at the rate established by the Town Council and will be based on water usage as determined by water meter readings. If a private well, or other water source is used, the Town will install a meter, at the customer's cost, between the water source and the building. Readings on the meter will serve as the means for computing sewer service charges. At its discretion, the Town may install a meter, at the customer's cost, directly on the sewer line to measure flow. In which case, the sewer meter readings will serve as the basis for billing. Sewer customers are subject to the billing regulations in the Water Ordinance and any associated penalties are applicable to provision of sewer services.

**ARTICLE X
Additional Services**

- Section 1 Any additional public sewer system services provided by the Town for which fee amounts are not provided in the Town Fee Schedule shall be charged at a rate equal to that charged by Loudoun Water.

**ARTICLE XI
Validity**

- Section 1 All ordinances or parts of ordinances in conflict herewith are hereby repealed.
- Section 2 The invalidity of any section, clause, sentence, or provision of this ordinance shall not affect the validity of any other part of this ordinance which can be given effect without such invalid part of parts.
- Section 3 This ordinance shall be in full force and effect from and after its passage.

The Round Hill Sewer Ordinance, as amended, is hereby re-enacted in its entirety.

This amendment will take effect upon its adoption.

Adopted _____, 2017
